

A Sencorp White Brand

Why is EffiMat® better than any VLM on the market today?

It's faster, more efficient, easier-to-use, quieter, expandable & customizable. Quite simply...it's better!

White offers the newly designed line of vertical lifts from EffiMat® Storage Technology.

A newly patented innovation allows for products to be stored in standard totes, a clear benefit over fixed-size, heavy, wide trays used in all other vertical lift systems.

This new design allows for substantially faster picking speeds. Standard totes provide efficient use of space, allowing more product inventory and replenishment capabilities. All of this increases productivity and lowers your operating cost.

Expanded foam PVC cladding provides quieter operation compared with all other VLM's.

Ease of integration using multiple EffiMat's, conveyors and horizontal carousels allow unparalleled flexibility and customization in work-flow, giving you faster, easier and more efficient product distribution and inventory management.

As a worldwide leader SencorpWhite is committed to setting and maintaining the highest customer satisfaction standards in the industry. Our teams are available 24/7/365 by phone, email, or on-site to assist you.

Outstanding Features

- 4 to 5 times faster picking speeds
- Tilt opening provides optimal ergonomics
- RFID and bar code scanning for peak efficiency
- Easy integration – interface with WMS, ERP, and MRP systems
- Tote level storage provides unsurpassed flexibility for stocking, picking (including batch and pick-and-pass), and buffering
- Optional infeed-outfeed transport automates replenishment and purging, and ties multiple units together for increased capacity

Ask your White Account Executive how an EffiMat® can be customized for your business needs.

Specifications

Equipment specifications:

Machine height: Up to 65 feet

S-Configuration: 15" wide x 23" deep tote size,
10 totes wide, footprint 17.5' wide x 7.5' deep

L-Configuration: 23" wide x 31" deep tote size,
8 totes wide, footprint 24' wide x 9.5' deep

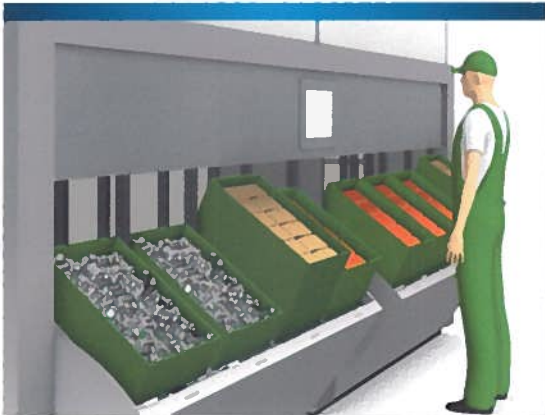

Tote capacity: 50 pounds maximum per tote

Power equipment: 460 Volt, 30 amp, 3 phase

Benefits

White's AS/RS EffiMat® VLM includes:

- Increased operational productivity for fast ROI
- Improved ergonomics
- Enhanced security for high-value goods
- Increased picking accuracy
- Accommodates industry standard totes and bins (optional)
- Flexible, reconfigurable storage locations

Ergonomically designed tilt access allows for more efficient user operation.
