

A Sencorp White Brand

Horizontal Carousel

Simply the best from the pioneer and leader in inventory management

SencorpWhite is an industry leader in secure packaging and advanced logistics systems. Innovative sealing and thermoform packaging systems, as well as custom inventory management hardware and software solutions serve a variety of markets including consumer products, life sciences, defense, and aerospace. SencorpWhite's best-in-class customer support, technical expertise, system reconditioning services, and parts replacement resources offer unbeatable reliability and value customers worldwide.

A market-leader in innovative, integrated inventory management and packaging solutions, SencorpWhite pioneered the original horizontal carousel, and has stayed at the cutting-edge of development over the last 60 years.

SencorpWhite's White brand horizontal carousels are automated storage and retrieval systems (AS/RS) consisting of a closed-loop horizontal track holding carriers (bins). When activated, the bins rotate to bring requested items to the operator.

White brand horizontal carousels with available integrated inventory control software and bar code scanning keep operations at peak efficiency. Integrated horizontal carousels improve competitive advantage for the toughest materials-handling and order-picking operations in manufacturing, industrial warehousing, and distribution center applications.

Outstanding Features

- Improved flexibility and efficiency for picking and fulfillment
- Fast ROI - recover your investment in less than 12 months
- High throughput - picking rates up to 950 lines per operator, per hour
- Reduce labor - save up to two-thirds of previously required man-hours
- High density, efficient storage - reclaim wasted floor space
- Easy integration - interface with WMS, ERP, and MRP systems

Ask your White Account Executive how a Horizontal Carousel can be customized for your business needs.
