

A Sencorp White Brand

Vertical Carousel Industrial/Warehouse

**Pioneer and leader in
inventory management systems
and software.**

SencorpWhite is an industry leader in secure packaging and advanced logistics systems. Innovative sealing and thermoform packaging systems, as well as custom inventory management hardware and software solutions, serve a variety of markets including consumer products, life sciences, defense, and aerospace. SencorpWhite's best-in-class customer support, technical expertise, system reconditioning services, and parts replacement resources offer unbeatable reliability and value for customers worldwide.

A market-leader in innovative, integrated inventory management and packaging solutions, SencorpWhite is one of the original carousel manufacturers, and has stayed at the cutting-edge of development over the last 60 years.

SencorpWhite's White brand vertical carousels are automated storage and retrieval systems (AS/RS) consisting of a closed-loop track holding carriers (pans). When activated, the pans rotate to bring requested items to the operator.

White brand vertical carousels increase storage density, throughput, and material-handling efficiency, while reducing inventory loss, labor cost, and wasted space. These carousels efficiently deliver product to the operator, maximize floor space, secure high-value inventory, and facilitate retrieval of anything from documentation to parts and tools.

White brand vertical carousels with integrated software allow for inventory control and bar code and RFID scanning to keep operations at peak efficiency.

Outstanding Features

- Improved flexibility and efficiency in picking and fulfillment
- Fast ROI - companies can often recover their investment in less than 12 months
- Reduced labor - save up to two-thirds of previously required man-hours
- Optional totes, bins, and drawers for small and large components increase storage flexibility
- Easy integration - interface with WMS, ERP, and MRP systems

Ask your White Account Executive how a Vertical Carousel can be customized for your business needs.

A Sencorp White Brand

Specifications

Equipment specifications:

Machine height: 36' maximum

Machine width: 180" maximum (Model 3600)

Number of pans: 50 maximum

Pan depth: 36" maximum (Model 3600)

Pan width: 144" maximum (Model 3600)

Pan capacity: 1,000 lbs maximum (Model 3600)

Optional SencorpWhite Software

- Integrated color touch screen HMI
- Bar code or RFID product scanning
- Internal RFID product identification
- Standalone, GPRS, satellite radio, WiFi, or Ethernet connectivity
- Automatic monitoring and reporting of stock levels
- Automatic email or text message warnings
- Multiple security levels for operator access
- User definable inventory management reporting
- Integration with third party ERP or WMS software systems

Carousel Options:

- Portable vertical carousels
- Fixed position carousels
- Heavy-duty carousels
- Refrigerated carousels
- Clean-room carousels
- TNFPA approved fire protection
- Fail-safe inventory access
- Light-directed put/pick
- Stainless steel pans
- Perforated pans
- Reversing air-flow
- HEPA filter
- Inert gas flush
- ERP/MRP interface
- IR, RF, or barcode inventory identification
- Multiple level user security and tracking

**Packaging and inventory management solutions for your evolving applications
