

CeraTek
A SencorpWhite Brand

The **QuickPouch Micro** is a small desktop semi-automated pouch opener, allowing for easier loading of pre-made pouches.

The QuickPouch Micro is easy to operate, with only a few hours of operator training required. Trained operators can load pouches up to 3-4 times faster than hand opening and filling. Automatic mode allows for a machine pace of 15 pouches per minute, a dramatic increase over hand opening and loading.

The QuickPouch Micro is also safe. Eliminating the need to manipulate pouches by hand significantly reduces RSI risks and carpal tunnel syndrome risks. The QuickPouch Micro is great for difficult to open pouches, or times when a 'third hand' is needed.

The QuickPouch Micro uses very little air and is incredibly easy to operate. The QuickPouch Micro+ is a larger version of the QuickPouch Micro, allowing for larger pouches.

FACTORY SPECIFICATIONS

- Automatic mode for production use
- Manual mode for intermittent use
- Tooling for one pouch size included
- Operator display
- Batch counter
- Total counter
- Delay timer
- Foot pedal trigger

DIMENSIONS

- Width: 12 inches
- Height: 10 inches
- Depth: 18 inches
- Weight: 251bs
- *Micro+ dimensions are larger
